KLE College of Pharmacy  
Vidyanagar, Hubballi

**7.1.3 Describe the facilities in the institution for the management of the following types of degradable and non-degradable waste.**

Our institute voluntarily avoids the use of severe corrosive chemicals during practical classes and prefers to use the less harmful and environmental friendly substitutes wherever possible. We also ensure only required quantity of chemicals get purchased so as to avoid wastage of any kind.

The solid waste from the laboratory is carefully collected, separated and disposed in utmost care so as not to cause any harm to the environment as well as to the person handling the waste as well. Special drainages are constructed to dispose of the liquid chemical waste that gets generated in the laboratories. To prevent hazardous fumes from chemicals to harm the individual using them, the laboratories are well equipped with fuming hoods. The institute does not generate and handle radioactive waste. E-waste is minimized by proper and periodical maintenance of the instruments and if they have crossed their lifetime validity arrangements are made to scrap them with e-waste vendors.
