MESSAGE

I am pleased to know that the KLE University's College of Pharmacy, Hubballi is publishing the College Magazine "**Infopharma- 2021**".

This magazine acts as a platform to explore the creativity and hidden talents of students, faculty as well. Over the years the college magazine has provided an opportunity for students to portray their topics of interest and share their ideas.

I am sure the students of Pharmacy College, Hubballi have enough potential for literary output. The students should grab this opportunity to showcase their literary talent in a nice way.

Since these college magazines are perused by lot of people especially the parents of the students. It should be ensured that the contents of this magazine should be of a high quality and magazine should be impressive.

The contents of the magazine should have ~~be~~ends of the academic excellence as well as the finest of the literary tune.

I wish this magazine all the success.

ABOUT OUR INSTITUTION :

K.L.E. College of Pharmacy, Hubballi is established in 1985 by the foresighted ALMA MATER, the Karnataka Lingayat Education Society. It has a distinction of being the first of its kind in Hubli-Dharwad region in an scenic location on the Pune-Bangalore highway makes this College a delight for students and has every infrastructure facility to offer the finest of education in Pharmacy.

This Institution offers B.Pharm., D.Pharm., M.Pharm. (Pharmaceutics, Pharmacology, Pharmaceutical Chemistry & Pharmacognosy) and Ph.D. Programmes.

All the courses conducted in this Institution are recognized by Government of Karnataka, Pharmacy Council of India and All India Council for Technical Education, New Delhi. From the academic year 2009-10, this institution is under the ambit of KAHER Belagavi and I am proud to say here that, KAHER Belagavi is the only private Health University in the County to get “A” Grade by NAAC with CGPA of 3.16 on four point scale.

A systematic and well-planned campus layout with excellent infrastructure facilities all go on to make K.L.E. an institute par excellence. Well equipped laboratories, sophisticated pilot plant set up, versatile library, banking facilities, cyber access are mere an iota of the enormous store of fabulous features of this institution. The College has well qualified teaching faculty comprising of 05 professors, 06 associate professors & 09 assistant professors along with well trained non-teaching staff.

With the intention of maintaining high standards the Institution underwent a process of reaccreditation for B.Pharm Course conducted by National Board of Accreditation (NBA), AICTE, New Delhi and successfully achieved it by w.e.f. 13.12.2011.

So far Institution has received over two crores as grants from various Government Funding Agencies such as AICTE, DST, VGST etc. for the promotion of research activities in the Institution for its continuous research activities.

The Institution has so far spawned over 200 Postgraduates 650 graduates and 1400 diploma holders with as many as 50 ranks at Diploma, Degree and Post Graduate Level.

Alumni of this Institution are well placed in various fields of the profession like Industry, Research, Teaching within India and Abroad.

The institute under the able guidance of the great visionary Dr.Prabhakar B. Kore, M.P. (Rajyasabha), Chancellor and Prof.(Dr.) Chandrakanth K.Kokate, Vice-Chancellor of KLE University aspires and targets to achieve excellence in the field of education.

OUR PLEDGE

India is my country and all Indians are my
brothers and sisters.

I love my country and I am proud of its rich and
varied heritage.

I shall always strive to be worthy of it.

I shall give respect to my parents, teachers and
elders and treat everyone with courtesy.

To my country and my people,
I pledge my devotion. In their well being and
prosperity alone, lies my happiness.

The LETTER "H"

Shreya Salgare, Pharm.D.

Pandemic...The one word that had loomed large at the start of and throughout the current crisis is "pandemic." The WHO officially declared COVID-19 as an infectious disease which had been spreading across the globe creating unprecedented lockdowns and quarantines. As discussion and debates sprang up around this single word, its heaviness began to weigh upon so many people. At the same time, the return of some of the simplicity of life pushed indoors.

As I thought about these things and this new word (pandemic) that seemed to suddenly permeate every aspect of life, and almost immediately I felt a visceral need for the "H".

Then I wanted an H. Could I find an H? I felt so greedy. I needed an H. I wanted "HOPE". And I wanted "HEAL". And I wanted even more than that. I could feel my heart begin to race. I stopped to think about where to find an H. And my mind drifted to thoughts of the doctors and the healthcare workers on the front lines like firefighters everywhere running into burning buildings selflessly trying to save strangers because that is what they do. But these raging fires are racing through hospital hallways, touching everyone in their paths. The heroes who are cleaning floors and emptying garbage. Those who are taking temperatures, answering phones,

delivering supplies to loading docks. Those who are caring for the sick, who are arriving at their doors of afraid and alone. Our healthcare workers who have become not only caregivers but spiritual warriors making sure that those who arrive alone do not die alone. I thought of the doctors and every health care workers who each in their own way were going into battle every day tending to the sick in an urgent care, refocusing, research on understanding this new virus and working toward a cure, pivoting from creating art to bagging groceries to keep people fed. And of the many, many people volunteering to make sure that those who are sheltering in place at risk of harm will be reassured by a voice of calm and care when they call for Help.....

So much heroism, So much kindness, So much sacrifice, humility, and humanity.

5 THINGS TO DO BEFORE YOU GRADUATE

- By Muskan P., Pharm.D.

1. **Build a routine:** human mind loves routine. Building a proper morning routine helps to energize your mind and tackle the rest your day with super ease. It also helps in making time for the things you love to do but were not able to owing to a busy schedule.
2. **Go on a grand friends trip:** this has to be one of the major goal of every student and my personal favourite thing on the bucket list. Experiencing a new city, new adventure, new destinations with your old buddies, is quite a combination to go.
3. **Volunteer for a good cause:** not only this helps society but also provides a sense of purpose and self esteem which are very healthy for a good career.
4. **Push yourself out of your comfort zone:** give yourself a chance to experience something unique, something which can add up to your versatility and exposure and who knows if you discover a hidden talent?
5. **Lastly, Make a scrap book:** journal and capture your journey through all the funny and proud moments of your college life before you graduate. A collection of memories and lots of experiences is worth reliving.

Importance of online Classes

- Raghu Harkuni , D.Pharm.

From past one year every thing changed include our life style, because of this Pandemic disease "covid 19" to save the people's from this Pandemic disease Government of India decide to put Lockdown over the country, which is one of the best way control the spreading of Covid 19.

Due to this Lockdown except essential survives like hospital and medical stores, everything were closed temporarily. including temples, government offices, private businesses, tourism places, school's colleges etc.

India is developing country, is developing especially in digital platform. Even though the school and college's are closed our learning doesn't stop. Our college started online classes so we keep on studying.

Using some online applications we can able continue study there. were teacher also helps us in learning on this way as it's new thing for all. in initial days we faced some issues because we didn't know how things has to be done, but now we are familiar with it. Teachers are clearing our doubts, now we are able study in online class like how we study in college before the lockdown. Covid 19 or the Lockdown doesn't made any difference in our studies.

We learned so things from covid 19, thank you for that, But I hope very soon everything will be reset again and coming back to the normal life as it before the lockdown.

COOL HUMAN BODY FACTS

- By Namratha D., Pharm-D

- 1) The nose can remember 50,000 different scents.
- 2) Women's hearts beat faster than men's.
- 3) The brain itself cannot feel pain.
- 4) Sneezes regularly exceed 100mph and nerve impulse to and from the brain travel as fast as 170miles per hour.
- 5) The average human brain has about 100 billion nerve cells.
- 6) It's impossible to sneeze with the eye's open!!
- 7) A baby is born without kneecaps. They don't get them until they're between 2 and 6.
- 8) Every person on this planet has an individual smell.
- 9) The average human beings swallow one liter of saliva a day.
- 10) There's a protein in the body called "PIKACHU RIM".

COLL

*

Cool air all around blowing,
She wants to fly like a bird,
Dance like a butterfly and touch
the rainbow formed in the sky.
Dew drops on the grass
touch her gentle feet,
With droplets of water falling
around like pearls,
and beautiful flowers blooming around.
But she can only imagine thus
as she is confined to a place.
Her dreams remain a dream.
Let her live, let her survive,
let her receive education.
To be the one amongst the best.
It is possible only,
When we let it happen.

IMPORTANCE OF TREES AND GLOBAL WARMING

- Raghu Harkuni, D.Pharm. I Yr.

Trees are very important, valuable and necessary to our existence as they have furnished us with two important life essentials; food and oxygen. Apart from basically keeping us alive, there are many other little and big benefits we get from trees. So, trees are vital resources for the survival of all living beings. Therefore, Governments world over and many Organizations are taking steps to prevent deforestation and to tell the benefits of planting trees. Let us go through some important points about the Importance of trees for the existence of human life.

Oxygen and Global Warming

Trees intakes Carbon dioxide from air and breathe out fresh oxygen for our life support. This cycle is made by nature to sustain other living beings. Further, the Carbon dioxide breathed in by the trees is one of the greenhouse gases. This and other greenhouse gases, when released into the atmosphere form a layer and trap the heat from the sun. They result in an increase in the atmospheric temperature. This causes global warming. So planting more trees will clean the air will reduce the global warming effect.

Ecosystem

Trees contribute to a rich healthy ecosystem. Animals, insects, birds, and fungi make their home in the trees and make a diverse ecosystem. This balanced environment, in turn, contributes to the betterment of human beings. Trees produce their own food and are found at the bottom of the food chain. They produce their own food through a process called photosynthesis and contribute significantly to the whole ecosystem. Further, trees are a rich source of medicines that are used to heal our diseases in a natural way as done Ayurveda.

Power of Pharmacist

June 16 7:32 PM Wed

Doctor is a actor...but
Pharmacist is a Director

If there is no pharmacist,
 There is no medicine
 If there is no medicine,then
 Doctors means nothing.

We are the life of future
 Proud to be a pharmacist.

My smile is Analgesic
 My touch is Anti-inflammatory
 My presence is hypnotics
 My feeling is Antipyretic
 My life is Anti-depressant
 But still proud to be " PHARMACIST"
